For commercial blueberry or pecan samples, indicate payment type:

Check _____ Money Order _____ Cash _____ Total _____

Make checks or money order payable to UNIVERSITY OF FLORIDA.

Important Information

- § Plant tissue analysis includes: **N, P, K, Ca, and Mg** (in percent); and **B, Cu, Fe, Mn, and Zn** (in ppm).
- § **Extension Diagnostic Plant Tissue samples** can only be submitted by a Florida Extension agent or specialist. Sample results are provided only to the agent/specialist, who is responsible for data interpretation for the client. This service is offered as a free educational service in support of the Florida Cooperative Extension Service.
- § **Blueberry and Pecan samples** may be submitted directly by the grower. Sample results are forwarded to an Extension blueberry or pecan specialist who evaluates the data and provides a report to the grower.

How To Take, Prepare, and Submit Plant Tissue Samples for Analysis

1. Ensure that each sample contains at least a generous handful of plant material.
2. Do not sample leaves contaminated with soil or sprays. If all tissue is dusty or spray contaminated, wash leaves gently with flowing distilled water.
3. Place tissue samples directly into a clean paper or cloth bag or envelope. Do not use plastic containers. If the plant tissue is wet or succulent, allow plant material to air dry for at least one day, before mailing.
4. When sampling suspected nutrient-deficient plants, two samples are recommended; one sample from normal plants, and another sample from abnormal plants.
5. Do not sample disease-, insect-, or mechanically damaged plant tissue.
6. Make checks payable to **University of Florida**. **Checks written in any other name(s) will NOT be honored and returned and will cause avoidable delay in processing the samples.**
7. When sampling, the plant part and plant maturity are important factors. Be sure to collect the proper plant part at the recommended time. A general rule of thumb is to sample the youngest, fully mature leaves during the growth cycle, or just prior to fruit set.
8. Mail this information sheet, your sample(s), and payment (if applicable) to: **IFAS Analytical Services Laboratories, Extension Soil Testing Laboratory**, PO Box 110740 / Wallace Building 631, Gainesville, Florida 32611-0740.
